Awa K. Penn

Let Claude EDIT your videos.

Get awa-video-reel in 5 steps

Awa K. Penn

Tools

Install these once. They're all free.

Claude Code

The desktop app or the terminal. claude.com/download

Google Chrome or Microsoft Edge

It records website b-roll in your browser. google.com/chrome

Node.js 20 or newer nodejs.org

Python 3.11 or 3.12 python.org

ffmpeg

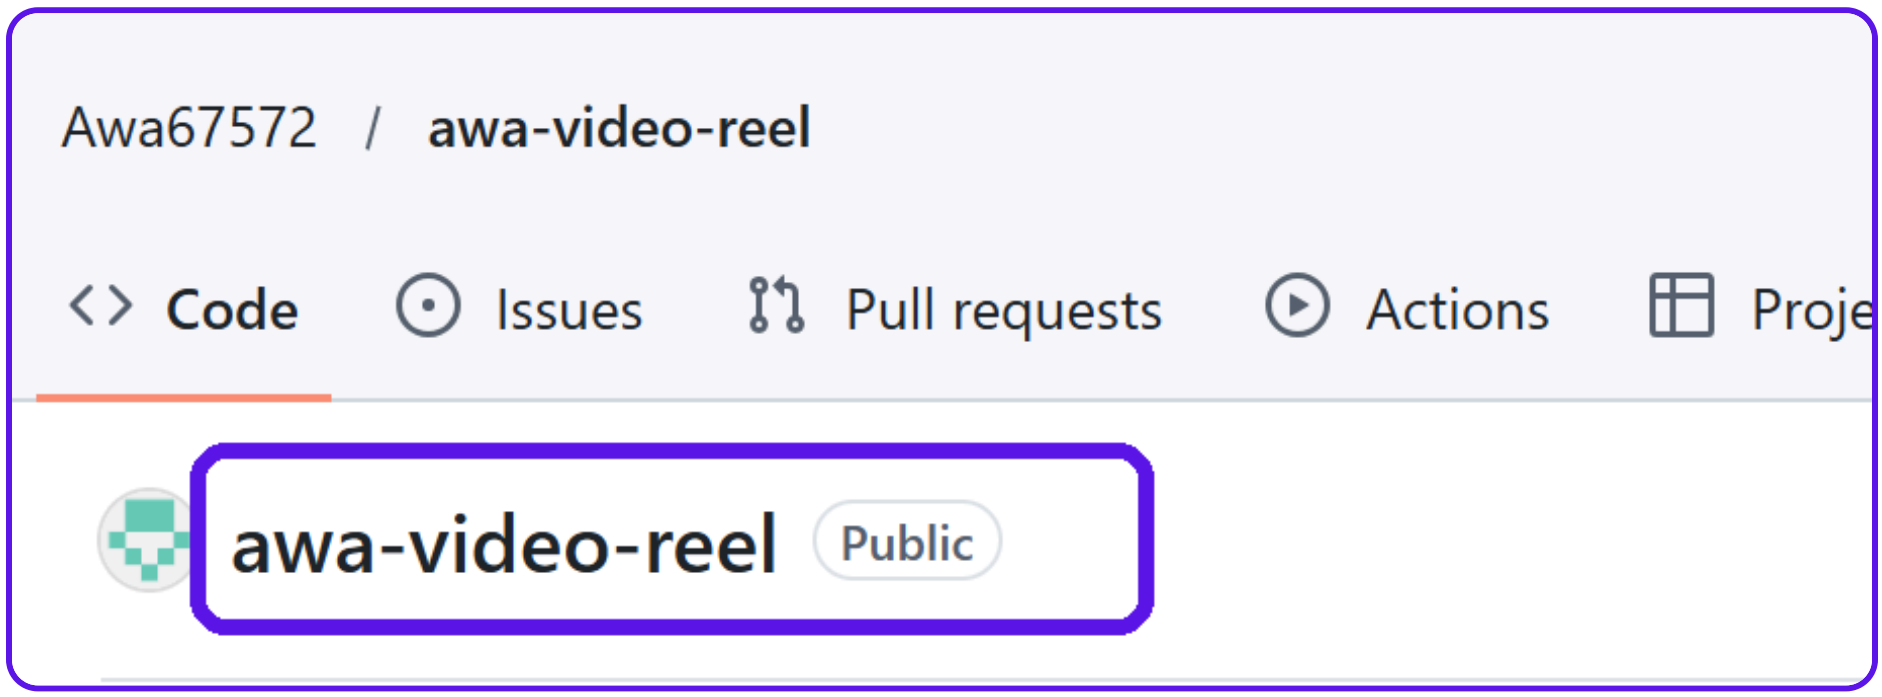

Windows: **winget install ffmpeg** Mac: **brew install ffmpeg**

Not sure how? Ask Claude Code: "Install Node.js, Python and ffmpeg for me."

Awa K. Penn

Open it

Go to my GitHub page:
github.com/Awa67572/awa-video-reel

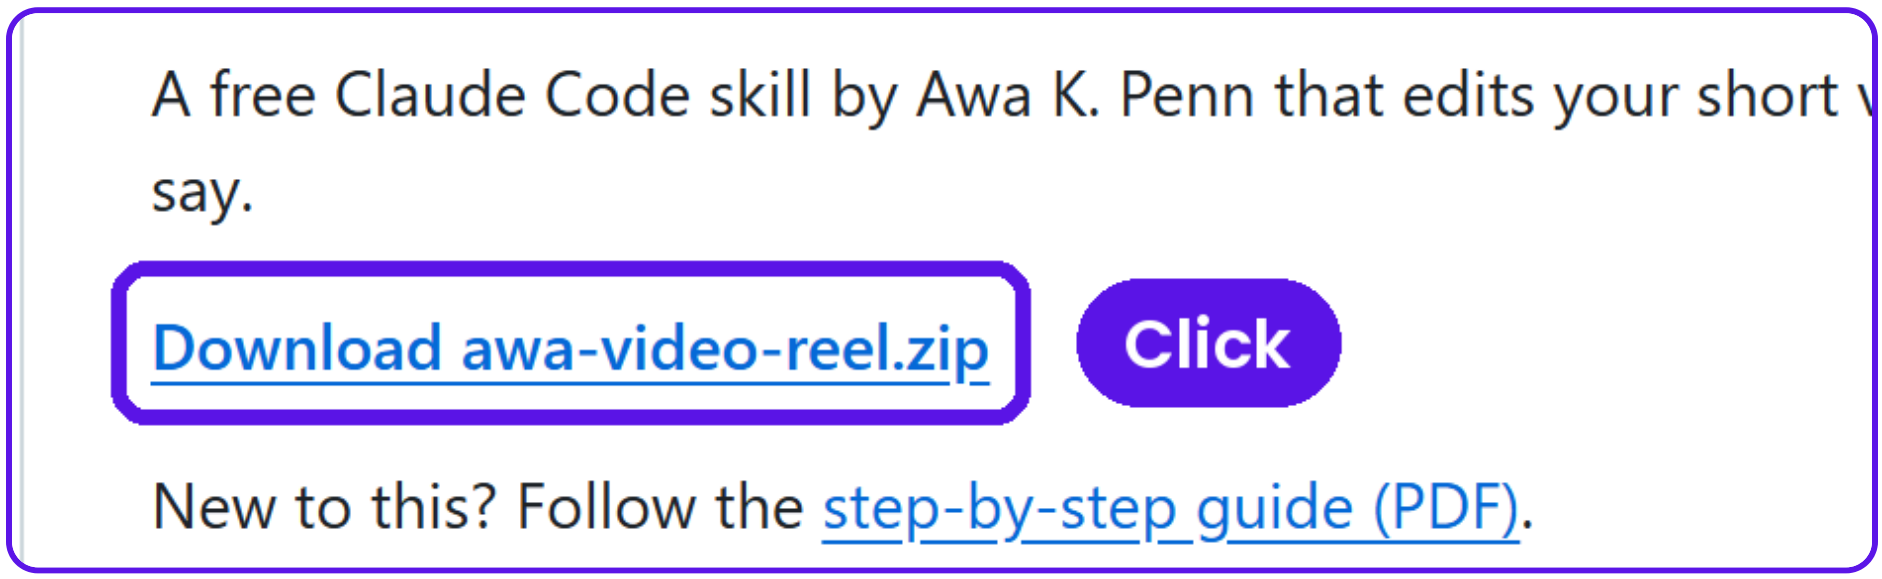

You're in the right place when you see **awa-video-reel** and **Public** at the top.

Good to know It's free. You don't need a GitHub account or to sign in.

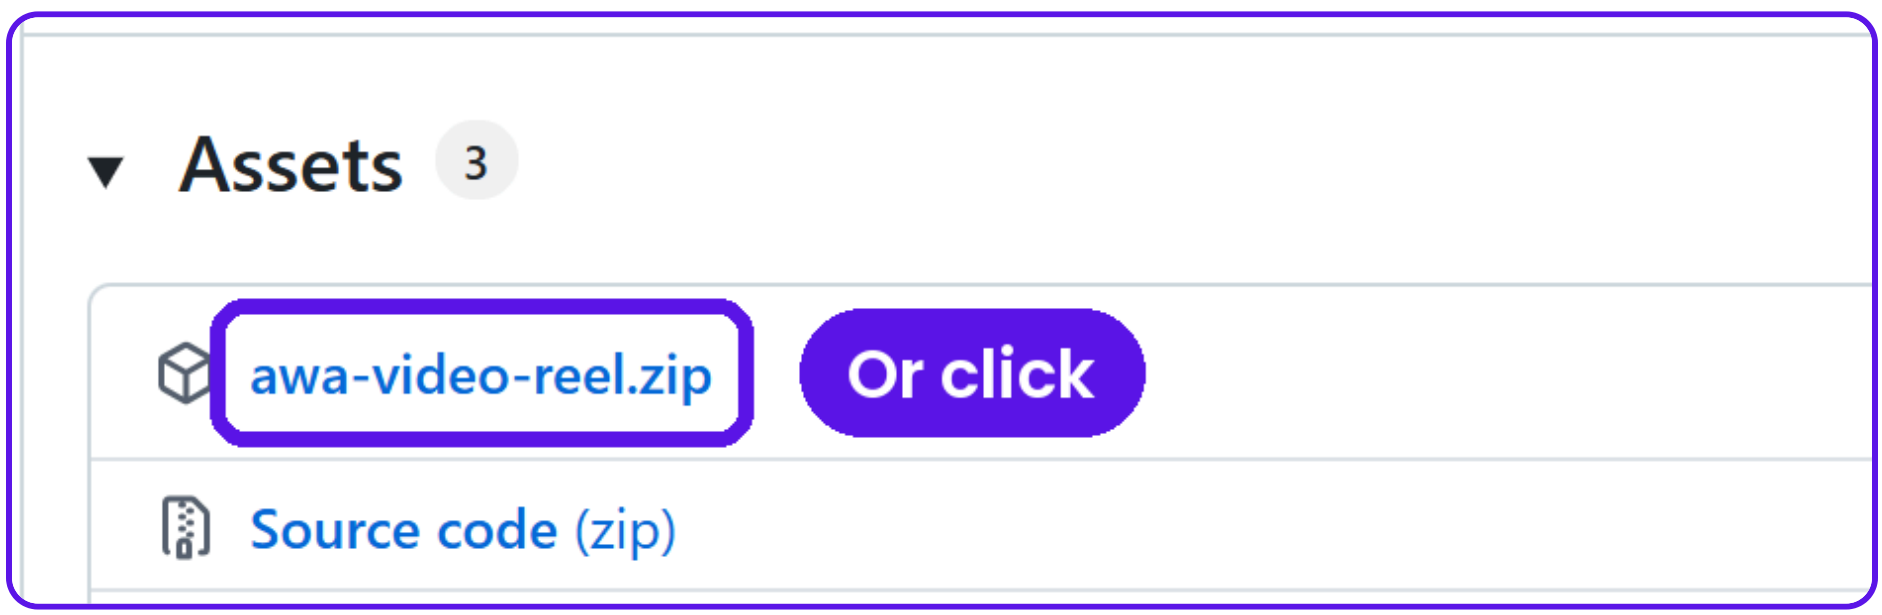

Awa K. Penn

Grab it

Click **Download awa-video-reel.zip**. It saves to your Downloads folder (61 MB).

Didn't start? Under **Releases** on the right of the page, click **awa-video-reel v1.0**, then the file:

Awa K. Penn

Unzip

Open your Downloads folder and find **awa-video-reel.zip**.

W On Windows

Right-click the file → **Extract All** → **Extract**

M On a Mac

Double-click the file.

Done when you see a folder called **awa-video-reel**. Inside it are **SKILL.md** and **INSTALL.md** .

Awa K. Penn

Install

Let Claude Code install it for you.

1 Copy the folder's path

Windows: right-click the **awa-video-reel** folder → **Copy as path**. Mac: right-click it, hold Option → **Copy as Pathname**.

2 Open Claude Code and paste this

> Install the skill in this folder: [paste the path]. Follow its INSTALL.md.

3 Restart Claude Code

Close it and open it again once Claude says it's installed.

By hand instead Copy the **awa-video-reel** folder into **~/.claude/skills/** (your home folder; **.claude** may be hidden).

Awa K. Penn

Use it

1 Drag in a video

Up to 1 minute, any shape, with or without you on camera.

2 Type /awa-video-reel

It transcribes the video and plans each edit from your words.

3 Talk about a website?

It asks if you want b-roll. Say yes, paste the link and it records the site with a visible cursor.

4 Approve the plan

Check the style, music, accent colour and end card. It renders only after you say yes.

5 Get two MP4s

In your Downloads folder: one with music, one without.

Try "/awa-video-reel Cinematic style. End on a follow card with @yourhandle."

Tips

Timing

The first run sets itself up in about 3 to 5 minutes. After that, a 40-second video takes about 6 to 8 minutes.

B-roll

It shows what a logged-out visitor sees and never signs in or buys. For pages behind a login, give Claude your own screen recording.

Music

Trending songs are copyrighted. Add them in Instagram or TikTok, on the copy without music. Most built-in tracks are CC0. If it uses the one CC BY track, it gives you the credit line.

Check it

The effects are starter versions. Watch every video before you post it.

Credits Effects engine: MIT licence (in **effects/LICENSE**). Captions and b-roll layout: HyperFrames by HeyGen. Cards: Remotion. Sound effects: Pixabay.
